Objective

I am a fourth-year computer engineering student interested in web application development and data engineering.
I am looking for an internship to apply what I've learned in the classroom to real projects to continue growing my skills.

Education

4th year student
Bachelor of computer engineering
Prince of Songkla University
(Hatyai campus)

Skills

- Programming Languages:

  - HTML, CSS, JavaScript,

  PHP, python,C, Java

- Frameworks and Libraries :

  - ReactJS, NodeJS, ExpressJS

- Database Management :

  - MySQL

- Tools

  - Postman

Experience

Data Pipeline Automation Project with Apache Airflow

- Create a simple Data Pipeline using Apache Airflow to extract data from existing sources and perform data audits, sending email notifications

Analyzed datasets using Python

- Analyzed datasets using Python and libraries (pandas, seaborn, matplotlib, and numpy) for data analysis and visualization

Money transfer slip checking

- Developed a web application to verify the authenticity of transfer receipts by determining whether the images are real or fake. using the SlipOK API with ReactJS and ExpressJS.

Weather Report Application

- Developed a cross-platform weather reporting application using React Native

OTP Verification using React (frontend)

- Developed OTP Verification frontend using React with UI components for OTP input and message handling, leveraging Tailwind CSS for responsive design

Student information management

- Developed a comprehensive student information management web application using CRUD RESTful API with ReactJS, NodeJS, and MySQL

Soft skills

- Teamwork: Working collaboratively with others towards a common goal.
- Stress Management: Dealing well with pressure and stressful situations.
- Adaptability/Flexibility: Being open to change, adjusting to new situations.
